**MEMORANDUM FOR: Acting Director of Central Intelligence**

**SUBJECT: G Contracts**

1. We prepared a detailed analysis of the G contracts provided by McMillan for the Director and thoroughly support his conviction that Vance's problem is a semantic one.

2. I am most reluctant to modify our existing contractual relationships, primarily because of the disastrous effect it will have on the SPS FULCRUM group and DD/S&T generally. The DOD nagging on technical direction is well known to our people via the EXCOM minutes, and any move to accommodation will be taken as capitulation to a ridiculous demand. We will receive little appreciation from DOD for our accommodation, since their basic intent is to thwart FULCRUM. Our position in the past has been absolutely proper, and I believe that we cannot appear to compromise it at this time.
